Subject: Wipro - Michael Yaacoub Year-end feedback

Hi Susie and Sinha,

I would like to provide a year-end feedback to Michael Yaacoub's year-end performance. Michael has been the most valuable team member here in our mobile app team. Michael has been assigned to the team since the beginning of the year, he has quickly picked up the Mobile DevOps work and has been the sole person handled numerous backend releases through out the year. Time of the release has always been 3am – 5am PT and Michael has never shown hesitation in handling the maintenance window. He has worked well with the our mobile app vendor and often bring new perspective and innovative ideas to the architect our backend infrastructure.

Not only that, Michael has built a tool that integrates with our vendors system to centralize support data so that our business partner can leverage for troubleshooting and chargeback process. This has brought great acceptance from our Finance and Consumer Support teams during the POC presentation. The establishment of this tool yield time reduction on manual troubleshooting spread across multiple platforms. In addition, Michael also automated the MPPA station store locator migration from Paydiant to P97, this is a significant improvement in time reduction of manual effort from 1 hour to 1 min.

I want to recognize Michael's contribution and effort he put in the team.

Thanks,
Maria

Subject: Feedback for Michael Yaacoub

Hi Everyone,

Good day.
I'm the Scrum Master of the Downstream Mobility team and I have worked closely with Michael Yaacoub as our team's Tech Lead.
I would soon be moving to a new role within Chevron but before doing so, I would like to give my feedback and commendations for Michael.

Michael has helped our team grow and mature a lot. He has successfully led the development of various applications within our team's portfolio. We rely heavily on him because of his vast experiences. I was able to witness his passion in sharing what he knows to all our developers. He is very patient when it comes to teaching, guiding and guiding our team members. Similarly, our team members enjoyed working with him. He almost have all the answers to our technical concerns/problems. I have seen an increase in the team's productivity when he joined us.
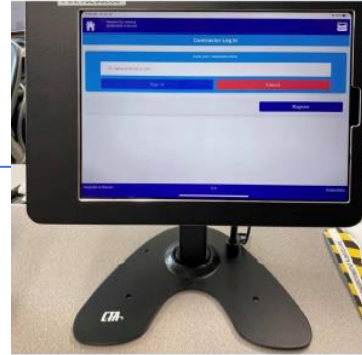

I have personally enjoyed working with Michael and I would definitely miss him.

Regards,
Dav

Huge Kudos to **Brach Bessant** for providing the vision for this application, the DS&C IT Mobility Team (**Jeena Lee, Michael Magdy Kamel Kamel Yaacoub, Marielle Lapidario,** and **Amir Moazami**) for developing this application, **Joey Dean** for helping coordinate the hardware and shipments, and a few other folks (**Tam Bui, Paul Liang, Timothy Settlemire, Brandon Engstrom, Dean Meier, Luis Roque, Samantha Pena, Pat Larracas**) for helping test the application and give feedback.

In February of this year, Brach Bessant was selected as one of the T&O Technology Contest winners. The technology idea that he submitted was to deploy an application for all visitors and contractors coming and going from the facility. Currently at our US Terminals, visitors and contractors enter the same information multiple times a week on paper. This information is then transferred into excel to calculate man-hours. Often times, handwriting is hard to read, and data quality is poor. This app was developed to reduce manual data entry, decrease human error, provide on-demand reporting capabilities, and provide a central repository for all visitor check-in information.

Brach helped set the vision for this application, and the DS&C IT Mobility team helped make this a reality! Starting next week, all visitors traveling to a terminal will sign-in using one of the designated kiosks as shown in the picture below.

Huge Kudos to **Brach Bessant** for providing the vision for this application, the DS&C IT Mobility Team (**Jeena Lee, Michael Magdy Kamel Kamel Yaacoub, Marielle Lapidario,** and **Amir Moazami**) for developing this application, **Joey Dean** for helping coordinate the hardware and shipments, and a few other folks (**Tam Bui, Paul Liang, Timothy Settlemire, Brandon Engstrom, Dean Meier, Luis Roque, Samantha Pena, Pat Larracas**) for helping test the application and give feedback.

Certificate of Appreciation

This Certificate is Presented to

Michael Yaacoub

on this 17th   day of November 2016

In appreciation for

Achieving a High Level of Client Delight

ITWORX

TO WHOM IT MAY CONCERN

This is to confirm that Mr. Michael Magdy Kamel was employed at ITWorx from 29th of August 2004 till 30th of November 2004 holding the position of Software Engineer.

Comments of his Technical lead are provided hereunder:

Michael worked under my direct supervision at ITWorx Egypt for a period of 3 months ending in December 2004. During that period Michael was responsible for implementing a customized business application using Microsoft and Oracle technologies. The project Michael contributed in is implementing the functionalities of an insurance brokerage business processes of one of ITWorx clients, Riskclick (www.riskclick.com) utilizing a customized workflow platform. The technology utilized in this project is Microsoft .NET and Oracle DBMS.

Michael was working very closely with team members & possessing an excellent team spirit. He is a hard-working self-starter who invariably understands exactly what a project is all about from the outset, and how to get it done properly. It was a pleasure to have him in our company.

Bassem Mohamed Abdel-Sattar

4. Recommendations

Joshua Samuel-Ojo
Software Engineer at Google
September 7, 2021, Michael was senior to Joshua but didn't manage directly

Michael's technical knowledge and experience in the mobile space are impressive. Team members and stakeholders frequently turned to Michael for design recommendations or issue resolution. Michael's ability to problem-solve some of the most complex issues in a creative and rational way along with his ability to explain these advanced concepts in simple terms is a skill I admire most. See less

Davin Gonzales
Scrum Master at Chevron
September 5, 2021, Michael worked with Davin in the same group

I had an awesome time working with Michael when I was still the Scrum Master for the Downstream 📱 Mobility team in Chevron... He was instrumental in helping our team grow and mature a lot. He has successfully led the development of various applications within our team's portfolio. We rely heavily on him because of his vast experiences and he always has suggestions to improve our products.
I was also able to witness his passion in sharing what he knows to all our developers. He is very patient when it comes to 🤝 teaching, mentoring and guiding our team members particularly the ones who have lesser experience.
Similarly, our team members enjoyed working with him. He almost have all the answers to our technical concerns/problems.
I have seen an increase in the team's productivity when he joined us. See less

Wassim Agban
Sr. Service Delivery Manager - Head of IT Local Services-North America East at Henkel
August 11, 2021, Wassim worked with Michael but at different companies

I worked with Michael in many project and I can confirm that he is not only very competent in SW engineering but he have exceptional project management and leadership skills. Michael is very result driven with people centric mindset and attitude.

Mina Labib, MBA
Associate Director - Innovation
August 7, 2021, Mina and Michael were students together

I have the pleasure to both study and work with Michael as we've undergrad and work colleague, he is smart, hard worker and always aiming to learn and apply something new. He is great team player and added value to any team he joins. I also remember one of the project he was the sole developer however he took responsibility and kept the project live and on track. I would recommend Michael to anyone. See less

George Saad, PhD
Software Engineer at Facebook
July 26, 2021, George and Michael were students together

Michael was my undergrad colleague in computer science at Alexandria University. Michael is thinking out of the box, developing the software applications properly in terms of code readability.
He was focusing on being uptodate to the new software technologies. He always finished his projects on or before the deadlines. See less

Magdy Yousif
Senior Software Engineer at Microsoft
July 21, 2021, Michael worked with Magdy in the same group

Michael is very committed and customer obsessed while at the same time keeping his great technical knowledge in a variety of areas up to date. I worked directly with him for a while and wish this could happen again soon.

Sameh Nabil Khalil
Customer Success Director at ITWorx
July 19, 2021, Michael worked with Sameh in the same group

Michael is a great asset to the team. He is able to design solutions using different platforms to create value to customers and end-users. He is flexible and quick to learn new technologies.

MANIMARAN RAMAKRISHNAN
Architect at Virtusa

July 16, 2021, Michael worked with MANIMARAN in the same group

Micahel is an excellent team player and one of the best Architects I have worked along with. A calm and silent in the office, but more enthusiastic when comes to work. His knowledge of SharePoint, Azure, and Ionic Mobile applications is commendable. He is a character like "Learn the technology in & out fully", before applying to real-time projects. I saw this in his personal Ionic mobile apps. He leads by example in Virtusa. A good forward-thinking Solution Architect. Having Michael in any project will automatically bringing added advantages for that project.. See less

Objective 2 | Grow business by sharing new opportunities with Wipro Leads

Objective
On regular basis, share new and existing opportunities with Wipro Leads to grow our business. I meet bi-weekly with:
(Ratheesh Kaippillil <ratheesh.kaippillil@wipro.com>, Sudhansu Sekhar Choudhury <sudhansu.sekhar@wipro.com>, Manu Sharma <manu.sharma8@wipro.com>)

L1 Manager Comments
Michael has been managing customer facing systems at Chevron namely Mobility app, loyalty systems, customer service and other third party systems. He has done a fantasic job of managing the scope of work under him and leading the team. He has established excellent rapport with many key Chevron stakeholders (internal and external) and opening up conversations in new areas with clients. His calm and pleasant expression, work ethics and being a team player has made him an invaluable part of the Chevron team.
Michael has got deep understanding of the B2C and B2B applicaiton stack. He also has got expertise in system architecture for both frontal and backend systems. He has kept himself updated by regularly taking on new tech certifications. We discussed that moving forward we will work on the following:
1. Understand key business issues for Chevron and other major US clients in the B2C and B2B space (customer life cycle management)
2. Create POVs to address the business issues, publish them, do account marketing and open up new conversations with US based accounts
3. The above will be done proactively; me and Michael will work on it together , Michael will own the entire proactive pitches prep and delivery

Jul 23, 2023 11:04:26 AM IST

The above is a great plan and puts Michael in the heart of what we want to achieve as a practice. Once the model is working in US, we can look at other regions.
I wish Michael best of luck for the coming year.
